

SUPER LOCK HOOK (with Swivel)

New series

SLH2S·3S

Optimal for lifting road plate and for safety hooking.

FEATURES

- Optimal for laying and removing road plate, and for lifting wire ropes and sling belts.
- The Hook is attached with a swivel eye and so has a good torsibility of wire rope, thereby preventing the turning of road plate.
- The mouth is wide enough for easy hooking and disengagement.
- When lifting the work, closing lock is automatically engaged to ensure safety.
- The main body and the shackle are made of special alloy steel molded and forged, whose optimal heat treatment ensures rigidity and superb durability.
- The main body is of baking finish.

EXAMPLES OF USE

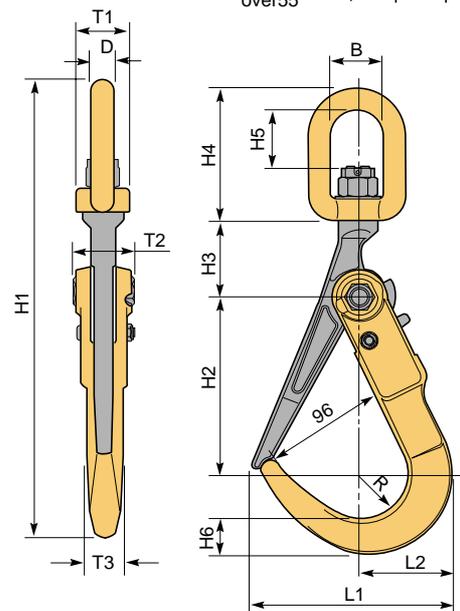

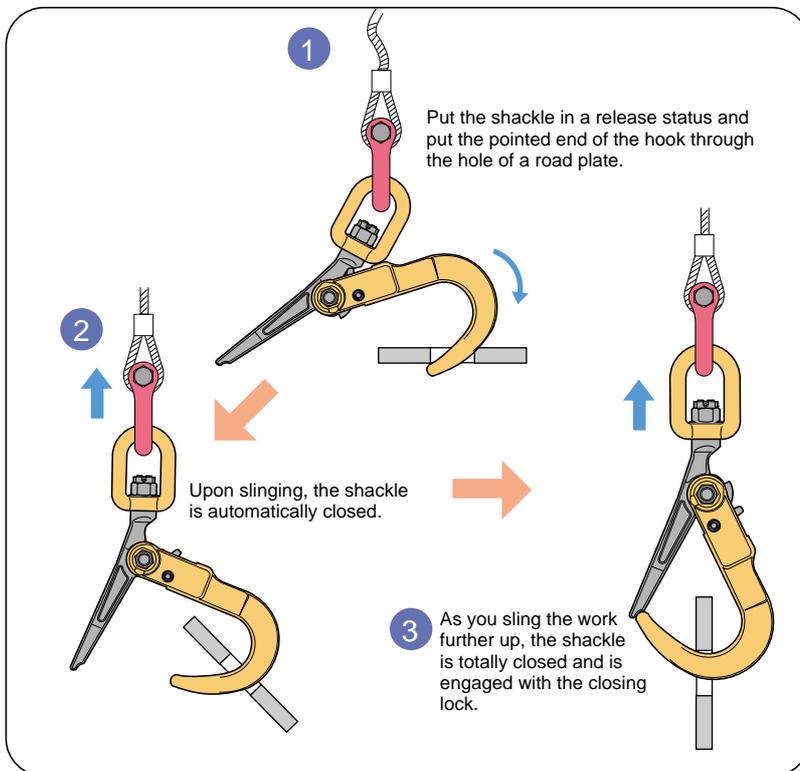

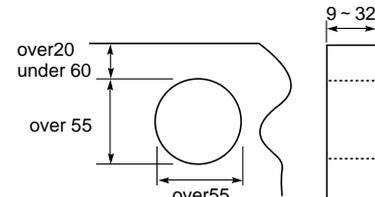

Laying and removing of road plate

For direct slinging as a safety Hook

The diameter of the hole and the thickness of road plate to be applied to shall be within the ranges stated in the drawing on the right.

(Unit:mm)
