

Elpress Mini

- battery powered crimping of terminals

Elpress MINI offers the new and easy way to do battery powered crimping of small and medium size terminals. This tool is available in three different types for best ergonomics and the crimps are made within the Elpress System. You will perform more than 150 crimps per charge.

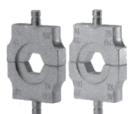

- Battery power 9.6 V and 2.0 Ah, charge time approx. 40 min.
- Very good access in confined areas and excellent ergonomy
- Fast crimp action 2-4 sec.

PV130P crimps pre-insulated terminals up to 6 mm² and un-insulated terminals up to 10 mm² as well as end ferrules up to 50 mm², all with parallel die travel.
Weight 1.3 kg, length 360 mm.

PV130S scissors type die movement crimps pre-insulated terminals up to 6 mm² and un-insulated terminals up to 10 mm² as well as end ferrules up to 50 mm².
Weight 1.5 kg, length 360 mm.

PV350 crimping of tube terminals and connectors up to 95 mm² (even higher in cases) with separate dies.
Weight 1.6 kg, length 360 mm.
